WHY THIS ARTICLE MATTERS

EDGE COMPUTING

VentureBeat

[How edge devices and infrastructure will shape the metaverse experience](#)

...using edge technologies for the metaverse will generate new use cases, business models and revenue streams for emerging businesses.

Startup AONDevices is creating amazing edge AI tech and we wanted to lift them into a bigger conversation. Tapping our connections at VentureBeat landed AONDevices in a thought leadership story with the big guys - Infosys, Accenture and CGS.

AONdevices

AONDevices is a semiconductor company based in Irvine, CA, that specializes in developing application-specific, high-accuracy super low-power edge AI processors, algorithms and solutions, making it perfect for battery-powered “always on” devices.
