Full Spectrum Flow Cytometry for Anticancer Drug Combinations

*A Q&A with Marc Birtwistle, Professor
of Chemical and Biomolecular
Engineering at Clemson University*

Leveraging customer endorsements can be a powerful tool. In this advertorial, a professor at a prominent university spoke with *Science Magazine* about how his team successfully used an instrument from Cytek Biosciences to better understand the behavior of cancer cells. This piece of sponsored content enabled Cytek and its customer to control the narrative and tell the story in their exact words – with the look and feel of an editorial article.

Cytek® Biosciences (Nasdaq:CTKB) is a leading cell analysis solutions company with a mission to improve life through scientific innovation. Cytek's powerful solutions are used at many of the world's most renowned pharmaceutical companies, CRO firms, and research and academic institutions. Powered by Cytek's patented Full Spectrum Profiling™ (FSP™) technology, these solutions enable scientists to rapidly and efficiently obtain deep biological insights through high-quality, high-parametric datasets. Applications that benefit from Cytek's cell analysis solutions include immunoncology, immunoprofiling, infectious and inflammatory diseases, genomics and drug discovery.
