The OCP Summit attracts leading technologists aiming to drive innovation in data centers through open source and collaboration. It provided an ideal stage for both KIOXIA and Pliops to showcase their contributions to advancing data center technologies. KIOXIA underscored their commitment to OCP and highlighted their innovations, while Pliops introduced their revolutionary data processing solution, a significant advancement for enterprises and cloud service providers. Our comprehensive roll-out program for top-tier trade shows includes news releases that effectively communicate key messages to media, partners, customers, and industry stakeholders.

KIOXIA

KIOXIA Innovations Drive the Open Compute Project Ecosystem Forward at the 2022 OCP Global Summit

New Breakthroughs from KIOXIA Bring Efficiency, Reliability, Security and Performance to Enterprise and Hyperscale Data Centers

Pliops Unveils Accelerated Key-Value Store That Boosts RocksDB Performance by 20x at OCP Global Summit

New XDP-Rocks Takes Key-Value Performance to Breakthrough Levels, Helps Customers Simplify, Accelerate KV-Based Databases
