### Zadara Federated Edge: New Public Edge Cloud Lets MSPs Take Their Services Anywhere

*Zadara's new Federated Edge is aimed at helping MSPs build and participate in a global cloud in which they can work with each other to provide services to customers.*

Where do you go when your client launches a new offering positioned for the channel? CRN, the number one publication for MSPs, VARs, Solution Providers and Resellers. A good example supporting the importance of the idea that the medium is the message.

**Zadara** is a cloud services provider that is simplifying operational complexity through automated end-to-end infrastructure provisioning of compute, storage and network resources. Zadara operates worldwide, including clouds in hundreds of data centers at public- and private-cloud partners, with an expert team that provides services and support.
