WHY THIS ARTICLE MATTERS

InfoWorld

A Smarter Way to Bring Data
Protection to SSD-Based Applications

When introducing a new product to solve an age-old problem, there is often a certain amount of skepticism involved. Will it really work? Why hasn't this been done before? What's the catch? We brought to Pliops one of the most preeminent IT publications, InfoWorld, to tackle the issue head-on for its new RAID solution. Through a contributed article, not only did Pliops make the case for why a new type of solution was needed, they provided verifiable, third-party evidence.

Pliops is a technology innovator focused on making data centers run faster and more efficiently. Its technology addresses skyrocketing data volumes and solves the storage software inefficiency problem. Investors include Softbank Ventures Asia, Intel Capital, Western Digital, NVIDIA and AMD.
