

CREATIVITY MATTERS

Email Marketing

Pliops leverages email marketing to keep prospects, partners, and stakeholders informed about new offerings, collaborations, tradeshow, and more. By landing in the inboxes of carefully cultivated contacts, they stay top of mind and build valuable mindshare. These campaigns complement core content on their website, blogs, and social channels, creating multiple touchpoints that boost awareness and prime audiences for action.

Join Us at NVIDIA-GTC This Week for the Essential Tools You Need To Thrive in the AI Era

Unlock AI's Unlimited Potential with Pliops

The memory capacity and bandwidth limitations of GPUs are holding your AI applications back.

Ready to break through? Pliops is here for you. Our EDP+LIQ+KV optimizes data infrastructure by addressing GPU performance and scale - while reducing TCO by 50%.

Pliops + Liquid Accelerated Vector Database Solution

At GTC, we'll be highlighting our collaboration with Liquid on an accelerated vector database solution. The integration of data accelerators with vector databases represents a critical advancement in the management and utilization of high-dimensional data.

Harnessing Data Accelerators For Vector Databases

Key Benefits Include:

- Supports various types of data type (audio, image, text) and its dimensionality
- Low response time for vector search queries
- 6x performance acceleration of vector search
- Multi-in data protection to tolerate vector storage outages
- Maximizing system efficiency for vector database deployments

Interested in boosting your vector database capabilities? Let's talk. At GTC, you can find Pliops at Liquid's booth #2626 on the show floor. You can also set up a call or appointment to meet us at the event by sending an email to marketing@plioptions.com.
